

Legacy IT Modernization Checklist

1. ASSESS & IDENTIFY

- ☐ List all legacy systems and applications.
- ☐ Highlight performance, cost, and security gaps.

2. DEFINE BUSINESS GOALS

- ☐ Align IT upgrades with agility, scalability, and growth needs.
- ☐ Set measurable outcomes (cost savings, faster delivery, better customer experience).

3. CHOOSE MODERNIZATION APPROACH

- ☐ Decide: Rehost (cloud migration), Refactor (optimize), Rearchitect (redesign), or Replace (retire outdated systems).
- ☐ Select the right technology stack (cloud, microservices, modern databases).

4. SECURITY & COMPLIANCE

- ☐ Ensure data security and encryption.
- ☐ Meet regulatory compliance (GDPR, HIPAA, etc.).
- ☐ Implement modern identity and access management.

5. PILOT & SCALE

- ☐ Run a small pilot migration/test.
- ☐ Gather user feedback & monitor performance.
- ☐ Scale gradually across departments.

Modernize Your Legacy Systems Today!

We help businesses embed security, accelerate delivery, and foster trust.
